

Sanjay Banerjee is the Cockrell Family Regents Chair Professor of Electrical and Computer Engineering and Director, Microelectronics Research Center, at the University of Texas at Austin. He received his B.Tech from the Indian Institute of Technology, Kharagpur, and his M.S. and Ph.D. from the University of Illinois at Urbana-Champaign in 1979, 1981 and 1983 respectively, all in electrical engineering. At Texas Instruments from 1983-1987, he worked on polysilicon transistors and dynamic random access trench memory cells used by TI in the world's first 4Megabit DRAM, for which he was co-recipient of the Best Paper Award, ISSCC, 1986. His recent awards include the Hocott Research Award from UT Austin (2007), Distinguished Alumnus Award, IIT (2005), Industrial R&D 100 Award in 2004, ECS Callinan Award, 2003, IEEE Millennium Medal, 2000 and SRC Inventor Recognition Award, 2000. He is a Fellow of IEEE, APS and AAAS. He is currently active in the areas of ultra high vacuum chemical vapor deposition for silicon-germanium-carbon heterostructure MOSFETs, nanoparticle flash memories and graphene transistors. He is also interested in ultra-shallow junction technology and semiconductor device modeling. He has over 700 archival refereed publications/talks, 7 books/chapters, and 26 U.S. patents in these areas.
